

Cloud Solutions

From CDI

CDI Cloud Solutions

At CDI, we understand the importance of “Cloud First” initiatives and are ready to help you make the move. We offer options for clients who want to be entirely cloud-based, along with solutions for those who want to maintain control and security over their data. Whether you’re looking for lift-and-shift, or an incremental migration, CDI’s Professional Services team will make the transition predictable and seamless.

CDI's Private Cloud Hosting

Laserfiche Cloud

Cloud Backup

Hardware

Professional Services

Managed Detection Response

Cloud Backup

Improve IT resiliency with CDI's Cloud Backup, encrypted online backup services for Laserfiche and everything else. Exchange, SharePoint, SQL, and Virtual Server backups are all supported.

Ideal for organizations that want to:

- Develop or enhance a disaster recovery plan
- Enhance AND simplify their IT footprint
- Archive to WORM/immutable format
- Create redundancy in backup plan

Features:

- Incremental nightly backups of critical data
- 256-bit encryption
- Restore files for up to 30 days
- Daily backup reporting
- Save to S3, Azure or Wasabi Cloud

Cloud Hosting

Simplify IT with Cloud Hosting – CDI's Private Cloud for your most important data. Let CDI manage your Laserfiche architecture and systems.

Ideal for organizations using on-premise licensing that want to:

- Use on-premise or self-hosted licensing
- Leverage a single cloud provider. Ideal for sophisticated implementations with integrations and large storage within Laserfiche

Features:

- Redundant Tier 1 data centers with 24/7 security, dual-factor authentication, and biometric scanners
- Automated rerouting of connections
- 3 TB network capacity
- Compliance for HITRUST, CSF, PCI, DSS and independent annual audits
- Daily backup statistics
- Multipoint redundant backup
- Endpoint and MDR included

Managed Detection & Response

Strengthen security with CDI's cybersecurity monitoring solution (MDR) that detects threats and provides rapid response 24/7.

Ideal for organizations that want to:

- Monitor their IT environment for threats and security notices
- Prepare for and respond to inevitable cyber security attacks on their network
- Implement a tailored solution that dynamically evolves to combat cyber threats

Features:

- Realtime monitoring of threats
- 24/7 response and guidance
- Endpoint filtering and protection
- Reporting and network statistics

Laserfiche Cloud

Simplify document management with Laserfiche Cloud - A fully cloud-based document management system with powerful information capture and Business Process Management.

Ideal for organizations that want to:

- Quickly and easily implement a Laserfiche Document Management system in the Cloud
- Transition existing Laserfiche system from on-premises licensing to cloud licensing
- Reduce IT headaches and costs with a cloud-based solution

Features:

- Immediately on and available with Amazon S3 infrastructure
- Advanced tools like Bots, Portals, Boomi and Mulesoft integrations
