

Junxure Cloud Integration for Laserfiche®

ABOUT

CDI's Junxure Cloud Integration creates a powerful link between records in Junxure Cloud and content in Laserfiche.

This versatile integration allows users to conveniently manage client-specific content stored in Laserfiche from within the Junxure Cloud interface. Users are then able to easily search, view, scan and import documents to Laserfiche directly from Junxure Cloud and incorporate that content into office Workflows.

The integration also allows for Laserfiche Templates to be dynamically populated with data from Junxure Cloud.

FEATURES

Junxure Cloud Integration Highlights

View Documents Through Junxure Cloud

View record-specific documents stored in Laserfiche from within Junxure Cloud

Scan Directly to Laserfiche

Scan documents directly to client folder in Laserfiche from Junxure Cloud.

Apply Junxure Cloud Metadata

Automatically apply Junxure Cloud metadata to newly scanned or imported documents

Easy Search Interface

Simplified search interface within Junxure Cloud for locating relevant documents in Laserfiche.

Workflow Process Efficiencies

Easily incorporate documents and data from Junxure Cloud in Workflow processes.

Subfolder Generation

Optional automated subfolder generation in Laserfiche for Junxure Cloud records.
